Disclaimer:

The European University Institute does not conduct separate teaching evaluations for individual professors or teaching assistants. Instead, all instructors involved in a course are evaluated jointly through a single survey. I have highlighted in yellow all comments that refer specifically to my teaching.

very good

N/A

N/A

Very good professors, engaging and great overall

N/A

Prof. Alessandro gave intuitions and practical comments, I feel it helpful to see econometrics from a bigger perspective

Alessandro TAROZZI: very good lecture over all topics and all topics is well explained.

N/A

Mealli: lot of things were not covered in class for lack of time
Tarozzi: very clear in explaining and all the material was covered

N/A

Both were very enthusiastic about the course and provided detailed explanations regarding its contents.

They both encouraged class participation

Good

Fabrizia : super dynamic, joyful but a confusing in explanations.
T: dynamic and clear.

N/A

N/A

Q12. Please provide your open comments and feedback about the course support provided by

Raffael Kind, Ezgi Arda

Both Raffael Kind and Ezgi Arda are very good. Their instruct is very helpful, help me a lot during the whole block.

Both Raffael and Ezgi did a great job as TA's for this class. They provided useful feedback on all the assignments well on time, and their classes were a great complement to the lectures. They made themselves available to answer any doubts during the sessions and office hours, and prepared very well their classes, which resulted in rich and efficient sessions where they put the focus in the most important topics for us.

Both TA put a lot of effort. Raffa was always very clear oh what to expect from the course and what were the fundamental things

Both really good TAs. Raffael was funny and competent - at the same time, he managed to make us feel "less stupid", by telling us about his experiences in his first year. I REALLY liked, that we had the TA Sessions BEFORE the problemset deadline - it helped me to learn so much more from the problemset!
Ezgi was a really competent and nice TA - she was able to answer all tricky questions from my collegues.
Both of them: Good Job!

Both very clear and available to answer questions and to explain the most topics in a tidy and clear way

Both were great TAs. Raffael's notes were very helpful for my exam preparation

Good

Great attentive TAs, not that much to note.

Raffa and ezgi were great. Very good communicating and making sure everyone understood the material

Raffael Kind: the TA was very helpful in understanding the subject. I appreciated the choice of (and effort in) teaching the material instead of redoing in class the problem sets.

Raffael and Ezgi were absolute lifesavers! I learned so much with them, and I was able to finally understand some topics I have struggled with in my past studies. They were always able to adress our questions and were both super kind and helpful. Their feedback on the PSs was also very useful!

Raffael was a great TA. He managed to break down difficult things and made them look a lot easier. He was also very clear in what was important and what we should focus an. It was very very helpful.
Ezgi was a good TA aswell. Sometimes, a bit more structure and basic explanations in the beginning would have helped me a bit to understand things better.

Raffael was super clear, always available for clarifications, and his lectures were very well structured. He puts the accent on the relevant stuff. Very good job.
Ezgi was always available for clarifications, and she puts structure to the course that otherwise would be not super well structured. Well done.

Raffael: super helpful, dynamic, very clear in explanations.
Ezgi: not super clear, notes not organized

Super, super, super.

Thank you for the great support! The summaries of the material you provided was extremely useful! Overall the TA sessions were a great complement to the lectures and really enjoyed doing the problem sets and the useful feedback.

The TAs are nice. Raffael taught from the students' perspective and his slides are practical, it's very nice

The TAs were very supportive and provided us with constructive feedback.

They are amazing.

They both give clear explanation about the course content. Good!

Very helpful and readily available to answer our questions and address our feedback.

very good

Q 13. Please share your considerations regarding the following aspects: The course provided an inclusive and respectful environment where researchers of all backgrounds (gender, ethnicity, nationality, religion, political leanings etc) could meaningfully contribute to discussions. The bibliographical sources included the work of underrepresented voices in the academia. Course instructors encouraged the use of inclusive language.

No concerns on the raised topics

-yes ; - not that relevant; - yes

Yes, the course was inclusive and respectful.

Good

Yes

Abre with all

No complaints on the topic

- Yes
- I don't know
- Yes, as the course is quite technical

I felt that the course was very inclusive in general.

Perfect

T.A. sessions

Q31 - Was there sufficient time to discuss the problem set in the T.A class?

5. Very much	29%	10
4. Considerably	43%	15
3. Average	20%	7
2. Not very much	9%	3
1. Not at all	0%	0
Total		35

Q32 - If the course had more than one teaching assistant, please provide open comments and feedback about the individual teaching assistants here

Ezgi and Raffael were absolutely fantastic! Their intelligence and willingness to help made a huge difference

Overall, both TAs were great and always helpful. Raffael was very organised and his TA classes were well structured. He was very prepared and ready to answer questions. He also had clear slides and was able to distinguish between the key aspects of the course and the secondary aspects. Ezgi was a bit less prepared, and had no slides which would have been helpful to support the classes.

Hardly went over the problem set, if at all.

I am satisfied with both TAs.

Q33 - Did the T.A. explain harder/trickier parts of the problem set well?

5. Very much	43%	15
4. Considerably	43%	15
3. Average	6%	2
2. Not very much	9%	3
1. Not at all	0%	0
Total		35

Q34 - If the course had more than one teaching assistant, please provide open comments and feedback about the individual teaching assistants here

No data found - your filters may be too exclusive!

Number of respones 35

Q39 - Did you feel that the T.A. understood the material sufficiently better than the students?

5. Very much	57%	20
4. Considerably	43%	15
3. Average	0%	0
2. Not very much	0%	0
1. Not at all	0%	0
Total		35

Q40 - If the course had more than one teaching assistant, please provide open comments and feedback about the individual teaching assistants here

Raffa was very clear and prepared the classes very well and with a strong focus on the relevant things.

Q12. Please provide your open comments and feedback about the course support provided by

Raffael Kind, Maria Uceda Atan

Both Raffa and Maria were very clear about the main focus for exam preparation from the very first TA session. They were always available to answer questions and go beyond the material when needed. They both did an excellent job. The feedback on the problem sets was also clear and detailed, which was very helpful for learning from mistakes. As a small and friendly suggestion for Maria: having a slightly more structured use of the blackboard — or occasionally complementing it with slides — could make the explanations even easier to follow. Sometimes, when examples were developed spontaneously, it could be a bit harder to keep track, especially for those seeing the material for the first time. But overeall, amazing job!

Both TAs were also great, really helped us understand certain harder topics by going in depth into them and answering all our doubts.

Both TAs were always happy to help at all times.
Raffael provided clear slides that summarised the lecture very well and it was very helpful for the Problem Sets.
I also liked Maria's approach on teaching on the board, because the pace was slower and it was easy to follow. She explained very well and put a lot of effort into helping us to understand every topic and emphasise what is important. (Which is not easy when there is a lot of material)

Both did a great job, they definitely helped me understand the material.

Both were very good and well prepared.

Raffael - useful sessions reintroducing all topics covered in the lecture.

Maria - useful applications of methods used in lectures. Could be extended from what's on the slides / old notes. F.e. we were shown 2 applications of GMM but difficult to come up with conditions on your own (which was later examined). The rush in the sessions was rather the implication of the amount of material, I wouldn't blame the TA for it.

Raffael Kind is really helpful and did a great job making Prof Mealli's part understandable. I can tell Maria Uceda Atan tried her best to prepare her part, but she did not seem confident enough.

Raffael and Maria did well to describe intuitively the mechanics of the course. They were good at bridging the gap from theory to practice.

It would have been nice to work on assignment feedback throughout the course rather than at the very end. In particular, one problem set needed a pretty radical rectification, and this was not handled until the revision session.
Thus, correct coverage of the Fisher confidence intervals was never really something we walked through.

Raffael i structure and well-prepared, very good at breaking down the more complex material. Maria was well-prepared but slightly disorganized due to nerves of teaching for the first time, but eventually improved. Made errors during class, often causing confusion

Raffael is the best TA we have had so far. He sets the standard for what a teaching assistant should be: clear, exam-oriented, and consistently available. His slides are amazing. 10/10
Also Maria is super clear and helpful, and she was very very good given that it was her first year teaching

Raffael was super nice with the slides, Maria was very nice personally but in my view tried to cover too much and her classes felt rushed.

Raffael: very clear teaching, very easy to follow, great slides.
Maria: Teaching was mostly clear. Using the board was not the best decision given the time constraints, or clarity. Improvement over the period of the course (good job still!)

Raffeal is exactly how i want my TAs to be, therefore the best i have ever had. I hope to be like him if i ever become a TA. Maria is great to, and she really have the skill of putting herself in students shoes, the most supportive a TA can be, both in class, during revision week, and during the exam too.

Raffeal's slides were super helpful and good to give structure to the course, Maria explained the vast material that we had very well as well

Sometimes, the TA sessions for the second part felt a bit unstructured. It might help to provide slides or clearer supporting material to guide the sessions and make the content easier to follow.

The TA sessions with Raffael were extremely helpful. He explained the topics very clearly and, in particular, had a strong ability to narrow down and structure the material in a way that made an otherwise dense and potentially overwhelming course feel much more manageable, especially in preparation for the exam. I also greatly appreciated that his TA sessions focused on reviewing and consolidating the material in advance, rather than directly solving the problem sets, which made me feel more confident and comfortable when working through them independently. Overall, I owe a significant part of my understanding of the course to his support.

Maria was the TA for the second part of the course. Her TA sessions were also very effective, as she reviewed the material in great detail and helped clarify more advanced concepts. This contributed greatly to a deeper and clearer understanding of the second half of the course.

Overall, both the TAs provided significant support during the course.

They conducted very good TA sessions, making material more understandable than with lectures alone. I think that problem sets however, although useful from the practical economist point of view, were a little bit detached wirh their focus on programming.

Very good TAs, very helpful.

Very helpful TAs!!! Raffa's slides are amazing and very useful for the course in general, and María's classes were super insightful!! Very nice experience with them

Course content (ECO department)

Q15 - Was the sequence and structure of the course clear?

5. Very much	32%	10
4. Considerably	42%	13
3. Average	26%	8
2. Not very much	0%	0
1. Not at all	0%	0
Total		31

Q16 - How much overlap was there between this seminar/course and a previous one you took in your previous MA programme?

5. Almost identical	3%	1
4. Considerably	42%	13
1. I do not have an MA degree prior to EUI	6%	2
3. Not very much	45%	14
2. Not at all	3%	1
Total		31

Q17 - Additional comments:

In my previous master's we focused less on the interpretation

I think this course is actually really helpful for research so it was very insightful!!!!!
